Re: WC Dkt. Nos. 13-97, 04-36, 07-243, 10-90 and CC Dkt. Nos. 95-116, 01-92, 99-200

Dear Ms. Dortch:

Attached is a report filed on behalf of SmartEdgeNet, LLC (dba Edge Communications) ("SEN") pursuant to paragraphs 99 and 103 of the *Notice of Proposed Rulemaking, Order, and Notice of Inquiry*, 28 FCC Red 5842 (2013), in the above captioned proceedings. In particular, the Commission required trial participants, such as SEN, to begin filing monthly reports sixty days after their requests for direct access to numbers from a numbering administrator that contain (1) the total of new numbers placed in service; (2) the total number of port-in requests, including existing as well as new customers) and the percentage of successful port-ins; (3) the number of port-out requests from a number held directly by the trial participant and the percentage of successful port-outs; (4) the total number of routing failures and the causes of such failures; and (5) a description of any billing or compensation disputes. SEN first submitted its request for direct access on July 27, 2013. Accordingly, SEN submitted its first report on September 25, 2013 and submits this, its second report, thirty days thereafter.

Please direct any questions about this report to the undersigned.

Respectfully submitted,

Randall B. Lowe
Attorney for SmartEdgeNet, LLC

Attachment

10/25/13 Number Access Report of SmartEdgeNet, LLC (dba Edge Communications)

As of 10/25/13, (1) the total of new numbers placed in service is zero; (2) there are no port-in requests and the percentage of successful port-ins is therefore zero; (3) there are no port-out requests from a number held directly by SEN and the percentage of successful port-outs is therefore zero; (4) there have been no routing failures; and (5) there have been no billing or compensation disputes.

On October 15, 2013, trial numbers went live in NPAC; voice testing began and IXC interstate traffic has completed to SEN's network without issue. Local and toll calls are completing from incumbent lines tested in Key West, FL and Dallas, TX. SEN is continuing negotiations with Smart City Telecom and CenturyLink on ICA's for Celebration, FL that they state they require.
